Top Skills

Chrome DevTools (DOM analysis)
jBPM
Postman API

Certifications

Java programming
Building Real-Time REST APIs with
Spring Boot - Blog App
PHP Course
Build Python Web Apps with Flask
Building RESTful APIs with Node.js
and Express

John Russelle Domingo

Software Engineer (Java) @NCS
Metro Manila

Summary

Full-Stack Developer | AI Engineering Enthusiast By day, I build scalable systems for finance and telecom. By night, I'm an avid tinkerer in the world of AI-augmented automation and web scraping. My latest hobby project is a high-performance TypeScript scraper built with Crawllee and Playwright. I'm currently focused on: Mastering browser automation to navigate complex, dynamic web structures. Implementing Zod for runtime data integrity. Creating CLI tools that make data extraction seamless and scalable. I believe the best way to stay sharp is to keep building—whether it's agentic workflows, "AI augmented coding" with LLMs, or extracting data from the far corners of the web.

Experience

NCS Group
Software Engineer
June 2024 - Present (2 years)
Taguig

responsible for designing, architecting, and developing advanced software solutions, adhering to organizational standards and best practices. For our client Sun Life, we enhance the GAP Engine Application using Spring Boot. It acts as an orchestrator, managing backend services and ensuring smooth communication between systems. Spring Boot makes this easier thanks to its modular design and reliable performance. We also use Jenkins to automate our build and deployment processes. With CI/CD pipelines, Jenkins handles tasks like code integration, testing, and deployment—helping us maintain a stable and efficient workflow with minimal manual effort.

Globe Telecom – FVT Unified Marketing Development Team

Utilized internal tools such as Decision Manager (DM) to manage audience segmentation, communications, and campaign propositions for subscriber-focused marketing initiatives. Leveraged jBPM to design and orchestrate business workflows supporting telecom campaign execution.

WeSupport Incorporated

Programmer Analyst

May 2022 - June 2024 (2 years 2 months)

Fort, Veritown, 8th Ave. &, 35th St, Taguig, 1637

Developing and maintaining backend features using Spring Boot, enabling reliable and scalable functionality across the Metrobank Teller System.

- Creating summaries and analytical reports to assist leads during presentations and decision-making processes.
- Communicating with vendors regarding change requests, while taking a sub-lead role in supporting critical applications.
- Preparing detailed deployment manuals and conducting actual deployments in the Production Environment.
- Providing technical support and conducting knowledge transfer sessions as a Subject Matter Expert (SME) for the system.
- Responding to inquiries and resolving issues related to the Metrobank Teller System, ensuring uninterrupted operational performance.
- Designing and executing unit tests and system tests to validate program functionality and maintain code quality.

Doconchain

Technology Back-end Developer

May 2021 - April 2022 (1 year)

Makati, National Capital Region, Philippines

Integrate and handle external api's and manage internal data controllers.

Create and Maintain API on server Side using Adonis JS frame work. Write code and tests, build prototypes, solve issues, profile and analyze bottlenecks.

Design perform, robust APIs to support mobile and desktop clients. Manage and optimize scalable distributed systems on the cloud. Optimization of web applications for performance and scalability.

Multisys Technologies Corporation

Consultant

August 2018 - May 2021 (2 years 10 months)

Philippines

*Technical support for payment verification from MISMO system through MULTIPAY and chat support.

*Report for error in handling mismo payment gateway.

*Database Administrator.

Maritime Industry Authority (MARINA - DOTC)

programmer I (Fullstack Developer)

July 2018 - April 2021 (2 years 10 months)

Philippines

Handle MISMO system and develop vessel information system. Web development using php, javascript, css, html, JQUERY, AJAX, Laravel, bootstrap, mysql, sqlite, sql, FPDF, and JSPDF. Provide support for seafarers MISMO system account retrieval and providing technical support through marina mail.

Develop Case Management System for legal division office.

Enhance Existing Web application. Handle and maintain databases.

Department of Environment and Natural Resources

Data Specialist

July 2017 - December 2017 (6 months)

san fernando, la union

Handles data entry management and validations for Land Managements System.

City Government of San Fernando, La Union

System Developer

January 2017 - March 2017 (3 months)

San Fernando, Ilocos Region, Philippines

create web application with PHP, JSPDF and FPDF using git.

Department of Labor and Employment Region 1

SPES Trainee

March 2016 - April 2016 (2 months)

San Fernando, Ilocos Region, Philippines

Basic trouble shooting on networks and hardwares.

Basic web development.

Education

Don Mariano Marcos Memorial State University

Bachelor of Science - BS, Information Technology · (2013 - 2017)
